

# CCDC Inject

<b>INJECT NAME</b>	Configure a Legal Disclaimer for Network Access
<b>INJECT ID</b>	LEGP02T

## **INJECT DESCRIPTION:**

Configure features in the network equipment and servers to issue a warning message prior to anyone logging in. Best practices standards are for the text of the message to include:

- 1.) A clear admonition that only authorized users are permitted.
- 2.) All network activity is being monitored and logged.
- 3.) That activity logs and other monitored information can be used to investigate and prosecute unauthorized access.

## **INJECT DELIVERABLE**

Respond with a business memo that presents the legal disclaimer that you are going to use

Provide screen shots for each device, showing the configuration of the login banner.
