Hi Tech Support,

We are having issues with our Debian 8.5 server, we have tried to reboot it but it's stuck on the following page:

Windows 10 ▾ 2016 ▾ Debian ▾ Ubuntu Srvr ▾ 2012 ▾ Ubuntu Wkst ▾ Splunk ▾ CentOS

```
[FAILED] Failed to start LSB: Starts ProFTPD daemon. See 'systemctl status proftpd.service' for details.
ls.
[FAILED] Failed to start LSB: Apache2 web server. See 'systemctl status apache2.service' for details.
ls.
[FAILED] Failed to start LSB: exim Mail Transport Agent. See 'systemctl status exim4.service' for details.
[ OK ] Created slice user-117.slice. Starting User Manager for UID 117... [ OK ]
Started User Manager for UID 117. Stopping User Manager for UID 117... [ OK ] Stopped User
Manager for UID 117. [ OK ] Removed slice user-117.slice. [ OK ] Created slice user-117.slice.
Starting User Manager for UID 117... [ OK ] Started User Manager for UID 117. Stopping

7.slice. [ OK ] Created slice user-117.slice. Starting User Manager for UID 117... [ OK ]
Started User Manager for UID 117. Stopping User Manager for UID 117... [ OK ] Stopped User
Manager for UID 117. [ OK ] Removed slice user-117.slice. [ OK ] Created slice user-117.slice.
Manager for UID 117. [ OK ] Removed slice user-117.slice. Manager for UID 117... [ OK ] Stopped User
```

After multiple reboot attempts, there is nothing we can do. Are you able to help with this?

Thanks,

Team 09
