

CCDC Inject

INJECT NAME	Protect from Denial of Service Attacks
INJECT ID	NETW10A

INJECT DESCRIPTION:

Using the existing tools in the network, make the needed configuration changes to protect the network from denial of service attacks at the perimeter of the network.

INJECT DELIVERABLE

Respond with a business memo that specifically addresses:

- 1.) Identify device and the configuration changes to implement this requirement.
- 2.) Explain the different types of DoS attacks that the configuration changes were designed to address.
- 3.) Provide screenshots of the configuration commands or GUI display.
