

CCDC Inject

INJECT NAME	VLAN Attack Concern
INJECT ID	NETW11A

INJECT DESCRIPTION:

The executive management committee has read about VLAN hopping attacks and is concerned that the organization's network is vulnerable to these types of attacks. Respond with a management memo to address these concerns.

INJECT DELIVERABLE

The memo should address the issues of:

1. Under what technical circumstances would the attack be possible.
2. Is the organization's network vulnerable to this type of attack.
3. Could the attack lead to a breach of data, or access of other servers.
