CCDC Inject

INJECT NAME	Enable Threat Protection on Next Gen Firewalls
INJECT ID	TOOL03T

INJECT DESCRIPTION:
Part of the advantages of deploying a Next Gen firewall at the perimeter is the ability to enable the IPS features within the security policy, known as threat protection. Enable threat protection on the organization's security policy.

INJECT DELIVERABLE
Respond with a business memo that describes how the threat protection feature is enabled. Include screen shots that document the configuration of threat protection is in place.
