Use this inject to submit Incident Reports (IR) as appropriate during the competition. Incident Reports are expected to be professional and with sufficient detail, enumerating the following:

- Clear description of the attack or incident
- Scope of the attack – how many systems, applications, services have been impacted.
- Time window and sequence of the attack
- Identification of the source for any attack
- Document the delivery mechanism
- Damage or monetary impact
- Describe remediation methods
- Provide supporting evidence, log files, diagnostics, &c

Timeliness of reporting relative to the time of an incident is also a factor in assessing IR reports.
