CCDC Inject

INJECT NAME	Create a Restrictive FW Policy
INJECT ID	TOOL01T

INJECT DESCRIPTION:
Create a firewall security policy that restricts the flow of packets both inbound and outbound. Each entry in the policy should be a specific as possible with regard to IP addressing/networks, transport protocols, port numbers, function codes, and application protocols.

INJECT DELIVERABLE
Respond with a business memo that uses a table to display each entry in the firewall security and the corresponding elements, together with a brief explanation of what this element of the policy accomplishes.

Include a screenshot of the actual policy as it is configured.
