CCDC Inject

INJECT NAME	Install Cacti SNMP Graphing Tool
INJECT ID	SOFT01T

INJECT DESCRIPTION:
Install the Cacti SNMP graphing tool on a server of your choice. The tool should be able to graph traffic statistics from each of the servers. You will need to enable SNMP as well as MySQL and other supporting software. You can find out more at www.cacti.net.

INJECT DELIVERABLE
Respond with a business memo that that show working graphs of traffic statistics from each server and a screen of process information (such as ps -ale on Linux) of the processes running.
