Management of password changes to active accounts is an important aspect of IT security. The attached file delineates active service accounts and current passwords. You may modify this file to document changes to passwords that can be uploaded to the scoring engine. Password changes should be submitted no more than once per hour.

Respond to this inject with your password changes, if you wish, making sure that you keep the same file format as the original. This is an exception to the rule of attaching pdf files for inject responses.

The password change request submission will go invalid when complete.

Teams should note that no admin, administrator, root, or sysadmin accounts are used for scoring.
