Team 1

EVAL02T

To the Information Network team:

I am writing to report on the enumeration and evaluation of the network protocols operating on our systems. The objective of this was to track everything that is running on our systems in order to track if something is supposed to be running, or should be removed from our systems.

In order to achieve this objective, we were working on tracking this. Unfortunately, due to core routing issues beyond our control, we were unable to download any tools such as NMAP that would allow us to track these things.

Attached is what we could get.

If you have any questions or need further information, please do not hesitate to reach out.

Best regards,

Group 1
